- * **analogue** – towing hook , its parameters correspond to basic requirements. It is possible difference in its shape and length.
- **the towing hooks, which have been mentioned in brackets, might not stand the asking strain of ISO5422 standard in case of dragging by angle, because of too long. The full working load is allowed in straight dragging only.
- *** 92-94 years produced cars *Golf and Vento* towing hook might have two kinds of threads: „left“ thread (No. 12) or „right“ thread (No. 49). *Polo* 91-94m – nr. 50 „left“ nr. 120 „right“ . IT IS NECESSARY TO CHECK IT !
- **** cars *Alfa Romeo – Fiat – Lancia* might use two kind of towing hooks: screw „in“ towing hooks (No.42) or screw „up“ towing hooks (No. 52). IT IS NECESSARY TO CHECK IT !
- ***** cars *Seat* for the same model might be two towing hooks: towing hook No.86 or towing hook No. 14. IT IS NECESSARY TO CHECK IT !
- ***** Chrysler 300 C. There may be two options: Thread 16mm – BK 140 , Thread 22mm – BK 117
